Defend Space Fortress number 13 from the dreaded Dronian Empire. A fight to the death is inevitable – they take no prisoners. They aim to vaporise your fortress and turn your viper interceptor to dust. Your task is terrifying, but you pilot the "viper", capable of tremendous speed and manoeverability, armed with the latest laser weaponry

The Fortress is capable of withstanding ten direct drone hits, before annhilation. Given time its radiators can dissipate the energy inflicted by the drones. A computer supplies up-to-the-minute reports on excess hull energy. Use Fortress sensors to aid your battle against the hunters, scouts, fighters, drones and support craft of the Dronian Empire

Beware of the gravity bombs left behind by the scouts. These anti-matter devices will swallow you up if you get too close.

Promotion to rank of 5 star General is possible if you defeat the drones.

SPACE FORTRESS. . .
